### Storm Response Update

**WAUKESHA, Wis.** – The City crews are working extensively in the area pictured in the map below. This area was hit very hard with the storm and has widespread tree damage with numerous trees down in public areas. While the crews are there, they are picking up storm damaged branches that residents have piled on the terrace (grass area between sidewalk and road). They will be working in this area the rest of this week. Anyone in the mapped area with storm branches from their private property that they would like collected must have them stacked on the terrace by 7am on Monday, August 16.

There is also storm damage throughout the rest of the City. Once crews have finished the hardest hit section detailed in the map, they will be doing a sweep through the rest of the City to pick up the storm branches that have been placed on the terrace. To make this more efficient, we are asking that if you have storm branches that are ready for pickup that you notify the Public Works Department by reporting it here: <https://gis.waukesha-wi.gov/RequestPortal> (Please select “Public Works” as the Issue Category and “Brush/Branch Collection” as the Issue) or by calling 262-524-3600. Any storm branches from residents not in the area mapped below need to be piled on the terrace by 7am on August 20.

The Drop-Off Center will also be opened temporarily this Saturday, August 14 from 8am-4pm for residents to bring any storm damaged branches. Please note that only storm branches will be accepted.

We appreciate your patience as our crews work to clean up from this storm.

## Initial Storm Branch Pick-Up Area

Items must be out by 7am on August 16.
